

## **Arctic GIS Planning Meeting Agenda**

Bell Harbor International Conference Center, Sound Room  
Seattle, Washington  
30 October 2003

### ***Meeting Goals:***

- Gather input on priorities for the development of an Arctic GIS and Arctic Geospatial Information Infrastructure (GII)
- Discuss approaches and capable groups for doing the work
- Identify individuals interested in continuing to advise NSF on the project

### ***Agenda***

- 2:30 pm      Opening Remarks by NSF  
                 Introduction of Participants
- 2:45 pm      NSF Objectives for Arctic GIS and Developing Arctic GI  
  - Where we are currently with development
  - Where we would like to go
  - Tasking of the participants
- 3:00 pm      Group Discussion: Meeting Goals and Important Questions  
                 1. Gather input from arctic GIS users and experts to outline steps to  
                      develop and maintain the Spatial Data Infrastructure for an Arctic GIS  
  - Functions needed and desired by users
  - Data layers to include in an Arctic GIS
  - Format of the user interface of an Arctic GIS
  - Access to data and metadata
  - System security and access to spatial data
  - Organizations and individuals who should be involved and what  
                      level of involvement is productive
  - Additional considerations for developing Arctic GI and Arctic GIS  
                 2. Discuss approaches and capable groups for doing the work  
                 3. Identify volunteers to continue working as advisors to this project
- 5:45 pm      Resolve Targeted Issues and Discuss Next Steps
- 6:30 pm      Break for Dinner
- 7:45 pm      Reconvene for Further Discussion if there is Interest
- 10:00 pm    Adjourn

30 October 2003
